### EXAMINER'S AMENDMENT

1. Applicant's election of claims 1-20 is acknowledged. Because Applicant did not distinctly and specifically point out the supposed error in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). **Applicant have the right to file a divisional application covering the subject matter of the non-elected claims 21-24.**

The traversal is on the ground(s) that see the election paper. This is not found persuasive because the fields of search for method' and device claims are NOT coextensive and the determinations of patentability of method and device claims are different, that is process limitations and device limitations are given weight differently in determining the patentability of the claimed inventions. Also, the strategies for doing text searching of the device claims and method claims are different. Thus, separate searches are required.

The requirement is still deemed proper and is therefore made **FINAL**.

2. An examiner's amendment to the record appears below. Should the change and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**Cancel claims 21-24.**

Claim 4, "about 50 to about 300 angstroms in thickness" should be --about 50 angstroms to about 300 angstroms--

### REASONS FOR ALLOWANCE

3. Claims 1-20 are allowed.

Art Unit: 2818

4. The following is an examiner's statement of reasons for allowance: None of the references of record teaches or suggests as cited in claims 1, 13, 18: removing the metal layer until the sacrificial layer is exposed, and wherein a dishing is induced in a top surface of the metal layer; then simultaneously removing the metal layer and the sacrificial layer until the dishing in the metal layer is substantially removed without substantially removing the hard mask layer (as cited in claim 1); providing a substrate, the substrate comprising a trench, a metal layer disposed in the trench wherein the metal layer comprises a dishing on a top surface of the metal layer, and a sacrificial layer disposed on a hard mask layer that is disposed on a first surface of the substrate; simultaneously polishing the metal layer and the sacrificial layer until the dishing is removed without substantially removing the hard mask layer (as cited in claim 13); removing the metal layer until the sacrificial layer is exposed, and wherein a dishing is induced in a top surface of the metal layer; then simultaneously removing the metal layer and the sacrificial layer at a second removal rate without substantially removing the hard mask layer (as cited in claim 18).

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
